SECTION 1	Introduction	1
SECTION 2	The Appellants Highway Evidence	2

Appendices

APPENDIX A.	Revised Bus Service Timetable
APPENDIX B.	TRICS Outputs

SECTION 1 Introduction

1.1.1 This Rebuttal Proof of Evidence ('Rebuttal') has been prepared in response to matters raised in the evidence of Mr Tom Fisher on behalf of Titchfield Festival Theatre (TFT – the Appellant) dated April 2024.

1.1.2 In preparing this rebuttal I have not addressed every matter raised in Evidence by Mr Fisher, but this does not mean that I am in agreement with any point by virtue of omission.

1.1.3 This Rebuttal should also be read as an addendum to my Proof dated 30 April 2024 and it remains the case that the opinions expressed are my true and professional opinions, given in accordance with guidance of my professional institution.

1.2 Structure of Evidence

1.2.1 The remainder of the Rebuttal raises the following matter within Section 2:

- A car park at Macfarlanes Packaging;
- Increase of evening bus services;
- A Car Park Management Plan;
- Restricted theatres use; and
- Multi-modal Trip Rates.

SECTION 2 The Appellants Highway Evidence

2.1 Introduction

2.1.1 Within Mr Fisher's Proof of Evidence, matters are raised regarding the following:

- A car park at Macfarlanes Packaging;
- Increase of evening bus services;
- A Car Park Management Plan;
- Restricted theatres use;
- Multi-modal Trip Rates; and

2.1.2 I address these matters in each section below.

2.2 Macfarlanes Packaging Car Park

2.2.1 Mr Fisher's Proof of Evidence sets out between section 5.10 and 5.11 that 55 parking spaces are offered within the Macfarlanes Packaging car park served via Stephenson Road.

2.2.2 The availability of this car park was not set out in the Appellants Statement of Case (**CDD.5**) or currently included on the TFT website as an available parking option. It is unclear from Mr Fisher's Proof of Evidence what times of day the car park is available from and to, whether all 55 parking spaces are exclusively available to TFT during those times and for how long the car park is secured for. It is also unclear whether this car park can be relied upon in perpetuity.

2.2.3 The walking distance between the Appeal Site and Macfarlanes Packaging car park via the formal crossing provision at St Margarets Roundabout is approximately 800m. Whilst the walking distance is acceptable in the context of CIHT Planning for Walking guidance (**CDC.2**) the route is time consuming and inconvenient as set out in Section 3.3.12 of my Proof of Evidence.

2.2.4 Without further clarity on the times and duration of parking availability, this provision cannot be relied upon and in my view, the walking distance which is at the upper end of an attractive walking distance in the context of CIHT Planning for Walking guidance (**CDC.2**) along a route identified as time consuming and inconvenient will reduce the prospect of theatre users utilising the car park.

2.3 Bus Services

2.3.1 Mr Fisher's Proof of Evidence sets out in section 4.29 that the X4 and X5 bus service will operate with increased frequency from May 2024 and additional evening services will be added to the timetable of bus service X4.

- 2.3.2 I have sourced the new timetables from *nationaljourneyplanner.travelinesw* for the new services (attached at **Appendix A**).
- 2.3.3 Bus service X5 serves the bus stops on Warsash Road which are located within an acceptable walking distance and can be accessed via an existing footway (noting occasions of indiscriminate parking blocking the footway). However, even with the new timetable the timings of the bus do not facilitate the return journey after a performance which finishes past 8.20pm. I remain of the opinion that the level of service is limited and does not provide a viable alternative to the private car for theatre visitors, even with additional services.
- 2.3.4 Bus service X4 serves the bus stops on Common Lane. As set out in section 3.4.2 and 3.4.3 of my Proof of Evidence, there is no continuous footway provision from the Appeal Site to these bus stops and they are beyond 400m, a distance which would not be considered convenient and lead to uptake of public transport to the Appeal Site. Despite the increase in evening services, the bus stops are not accessible and I remain of the view that travel by public transport to the Appeal Site is an unattractive option for the majority of theatre visitors.

2.4 **Car Park Management Plan**

- 2.4.1 Mr Fisher's Proof of Evidence sets out in section 5.27 to 5.35 information regarding a proposed Car Park Management Plan (CPMP), stating it "*has been developed in order to ensure that the car park does not have a detrimental impact on the operation of the local highway network*".
- 2.4.2 In my opinion the CPMP is considered necessary by the Appellant as the layout and level of provision provided at the Appeal Site is unacceptable.
- 2.4.3 In section 5.30, Mr Fisher states the staff members who will operate and manage the CPMP "*will not be on public highway but within private land and will not direct traffic on the public highway*". However, this appears to then be contradicted in section 5.33, where it is stated that staff members "*will also stop any vehicles parking along St Margarets Lane and direct them to the most appropriate car parking provision*".
- 2.4.4 Section 5.30 of Mr Fisher's Proof of Evidence, also states that vehicles will be held within the Appeal Site to ensure free flow conditions for non-theatre traffic on St Margarets Lane. From my observations set out within section 3.7.1 of my Proof of Evidence, queuing occurred on St Margarets Lane as vehicles were waiting to gain access to the Appeal Site parking area, before a performance. This occurrence and subsequent impact will not be addressed based on controlling only egressing vehicles the Appeal Site parking area after a performance.

2.4.5 In my opinion the measures set out within the CPMP will not address the overspill parking that has been evidenced and indiscriminate parking will still occur within in an impact on highway operation and an unacceptable impact on safety, contrary to Policy R2, TIN1 and TIN 2 of Fareham Local Plan 2037 (CDC.7) and NPPF paragraph 115 (CDC.9).

2.5 Restricted Theatres Use

2.5.1 Mr Fisher’s Proof of Evidence sets out in section 5.2 that the Appellant will be looking to restrict the use of the Arden Theatre to sole use. My Proof of Evidence addresses this within the scenario tests in section 4.6, setting out a parking shortfall still remains even with this restriction in place.

2.6 Multi-modal Trip Rates

2.6.1 Mr Fisher’s Proof of Evidence sets out in section 6.3 and 6.4 that the TRICS 7.11.1 database has been used to establish the level of multi-modal trips which would be expected to be generated by the site, noting that a site in Gateshead has been identified as a comparable site.

2.6.2 The TRICs results are presented within Appendix N of Mr Fisher’s Proof of Evidence, but only includes outputs for Total Vehicles and Cars, not all modes. I have replicated the TRIC’s 7.11.1 search and attach the full multi-modal TRICs outputs as **Appendix B**. Table 2.1 below sets out a summary of the results.

Table 2.1 Multi-Modal Trip Generation Forecasts

Mode	Theatre Peak (22:00-23:00)	
	Arrivals	Departures
Vehicular Trip Rate	0.000	0.316
Vehicle Trips (463 seats)	0	147
Pedestrian Trip Rate	0.000	0.080
Pedestrian Trips (463 seats)	0	38
Bus/Tram Trip Rate	0.000	0.053
Bus/Tram Trips (463 seats)	0	26
Coach Trip Rate	0.000	0.262
Coach Trips (463 seats)	0	122

2.6.3 The TRIC’s trip generation assessment shows that applying the trip rates from the comparable site generates 26 bus/tram trips and 122 coach trips. This is a significant proportion of theatre visitors, and these travel options are not available to theatre users at the Appeal Site. This reinforces my view that travel to the Appeal Site will predominantly be undertaken by private car resulting in overspill parking, with subsequent impacts as evidenced within section 4.6.13 of my Proof of Evidence. This also reinforces my view that the parking standard of 1 space per 5 seats is very conservative as set out within section 4.4.4 of my Proof of Evidence.

Notes: § - Time at this stop is indicative. You are advised to be at any stop several minutes before the times shown

X4

Southampton - Fareham - Portsmouth

First in Hampshire

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Southampton - Fareham - Portsmouth

First in Hampshire

Continued from previous page.

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgttd 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

SMS Code	Stop Name	Street	ATCO Code

**X4****Southampton - Fareham - Portsmouth**

First in Hampshire

Important information related to service X4 at 08:59:06 on 7th May 2024**HM Government Adult single fare cap update***Valid from 1454 on 25 Oct 2023 until 2359 on 31 Dec 2024*

Most operators are taking part in the Government's capped Adult single fare scheme. The maximum Adult single fare is £2 on most local bus services until 31st December 2024. School and college buses, coach services (including Falcon, Oxford Tube and airport services), Sightseeing Tours and Night Buses are excluded.

Cams Hill / Down End Road, bus stop closed for 6 months*Valid from 0713 on 29 Jan 2024 until 1559 on 28 Jul 2024***Affected stops:*****Wallington (Fareham), Down End Road***

Please note the details of a bus stop suspension on **Cams Hill** in **Fareham** for highway improvement work. The stop is called: **Down End Road** **Start of suspension:** 29/01/2024 0800 **End of suspension:** 28/07/2024 1600 A temporary stop will NOT be supplied, and passengers should use the alternative stop, at Birdwood Grove, approximately 280m to the east

Timetables

Select a timetable using the bookmarks (on the left of this page). Choose the direction and day of travel you require. Stop and Street Names and SMS codes are also available.

Timetable valid from 26/05/2024 until further notice.

Direction of stops: where shown (eg: W-bound) this is the compass direction towards which the bus is pointing when it stops

Mondays to Fridays

§ Woolston, adj St Annes Road																	

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Continued from previous page.

For times of the next departures from a particular stop you can use **traveline-txt** - by sending the SMS code to **84268**. Add the service number after the code if you just want a specific service - eg: **buctdgt 60**. The return message from **traveline-txt** will show the next three departures, and it currently costs 25p plus any message sending charge. Departure times will be real-time predictions where available, or scheduled departure times if not.

You can also get the same information by using the SMS code at www.nextbuses.mobi (only normal browsing charges apply) or through several iPhone or Android apps that offer access to **NextBuses**.

NOTE: SMS codes are different in each direction. Make sure you choose the right direction from these lists.

Important information related to service X5 at 09:00:31 on 7th May 2024**Warsash Road - X5 diversion**

Valid from 0925 on 28 May 2024 until 1559 on 31 May 2024

Warsash Road will be closed 28/05/2024 – 31/05/2024 09:30 – 16:00 Services **X5 to Southampton** from Locks Road ; Heath Road to roundabout; Lockswood Road, to roundabout and exit back onto normal route. Services **X5 to Gosport** From Warsash Village, to roundabout, then Lockswood Road, to roundabout; Peters Road, to the end onto Locks Road back onto normal route

HM Government Adult single fare cap update

Valid from 1454 on 25 Oct 2023 until 2359 on 31 Dec 2024

Most operators are taking part in the Government's capped Adult single fare scheme. The maximum Adult single fare is £2 on most local bus services until 31st December 2024. School and college buses, coach services (including Falcon, Oxford Tube and airport services), Sightseeing Tours and Night Buses are excluded.

Timetables

Select a timetable using the bookmarks (on the left of this page). Choose the direction and day of travel you require. Stop and Street Names and SMS codes are also available.

APPENDIX B. TRICS Outputs

Calculation Reference: AUDIT-236601-240502-0502

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 07 - LEISURE
Category : W - THEATRE

MULTI-MODAL TOTAL VEHICLES

Selected regions and areas:

09 NORTH
TW TYNE & WEAR 1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: Number of seats
 Actual Range: 187 to 341 (units:)
 Range Selected by User: 187 to 1915 (units:)

Parking Spaces Range: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/04 to 19/10/13

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday 1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count 1 days
 Directional ATC Count 0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Suburban Area (PPS6 Out of Centre) 1

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone 1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Inclusion of Servicing Vehicles Counts:

Servicing vehicles Included X days - Selected
 Servicing vehicles Excluded 2 days - Selected

Secondary Filtering selection:

Use Class:

Sui Generis 1 days

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 500m Range:

All Surveys Included

Population within 1 mile:

25,001 to 50,000 1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Secondary Filtering selection (Cont.):

Population within 5 miles:

250,001 to 500,000

1 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0

1 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling within a radius of 5-miles of selected survey sites.

Travel Plan:

No

1 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present

1 days

This data displays the number of selected surveys with PTAL Ratings.

LIST OF SITES relevant to selection parameters

1 TW-07-W-01 THEATRE TYNE & WEAR
 SALTWELL VIEW
 GATESHEAD

Suburban Area (PPS6 Out of Centre)
 Residential Zone

Total Number of seats: 187

Survey date: MONDAY

07/10/13

Survey Type: MANUAL

This section provides a list of all survey sites and days in the selected set. For each individual survey site, it displays a unique site reference code and site address, the selected trip rate calculation parameter and its value, the day of the week and date of each survey, and whether the survey was a manual classified count or an ATC count.

MANUALLY DESELECTED SURVEYS

22:00 - 23:00	1	187	0.000	1	187	0.316	1	187	0.316
23:00 - 24:00									
Total Rates:			0.343			0.343			0.686

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. The Company authorises those who possess a current TRICS licence to access the TRICS Database and copy the data contained within the TRICS Database for the licence holders' use only. Parameter summary

Trip rate parameter range selected: 187 - 341 (units:)
 Survey date date range: 01/01/04 - 19/10/13
 Number of weekdays (Monday-Friday): 1
 Number of Saturdays: 1
 Number of Sundays: 0
 Surveys automatically removed from selection: 1
 Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are show. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.

Total Rates:			0.107			0.117			0.224

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

*To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: COUNT/TRP*FACT. Trip rates are then rounded to 3 decimal places.*
