

Lee Residents Association Closing Statement.

The Lee Residents Association would like to reiterate the impact that these two planning application and any further speculative applications would have on the Resident's quality of life and access to all local employment sites. The impact on the local roads will cause further misery when traveling in and out of the peninsula, in addition to the extra strain on the local Health & Education facilities, already at capacity.

Having waited for years to have reasonable road access, it is morally indefensible that these new benefits and quality of life be rescinded for the pecuniary advantages of others, and the benefit of the neighbouring Borough that has a duty to cooperate.
