## **APPENDICES**

## **APPENDIX 1**

Information obtained from Hampshire Biodiversity  
Information Centre

## Protected and Notable Species Records (full list)

Search Area: Within the Land North of Fareham, Hampshire

Date: 18/09/2020

HBIC Ref: 9344

See this [Legislation Explanatory Document](#) for a document explaining notable species statuses and legislation.

HBIC has its own extensive database of habitat and higher plant data for the County. In addition, HBIC hold copies of datasets belonging to partner organisations. Through data exchange agreements with these organisations HBIC is provided with regular database updates and can supply species information on their behalf. HBIC currently holds copies of the following datasets:

- Botanical Society of Britain and Ireland's (BSBI) vascular plant database for Hampshire
- British Bryological Society (Mosses, Liverworts, Hornworts)
- Butterfly Conservation's butterfly and moth database for Hampshire
- Hampshire Ornithological Society (HOS) bird records
- Hampshire Bat Group (HBG) Records of bat roost visits and sightings
- Survey data administered by the Hampshire and Isle of Wight Wildlife Trust (HIWWT):
  - Monitoring Survey for the Nail Fungus *Poronia punctata*
  - Alien and Native Crayfish
- Data administered by the Hampshire and Isle of Wight Wildlife Trust on behalf of:
  - Hampshire Amphibian and Reptile Recording Network (HARRN)
  - Hampshire Mammal Group (HMG)
- Hampshire records from The Bees, Wasps and Ants Recording Society (BWARS)
- Hampshire records from National Stag Beetle Surveys and 'Great Stag Hunts' run by the Peoples Trust for Endangered Species (PTES)
- Hampshire Odonata records from The Dragonfly Recording Network, maintained by the British Dragonfly Society (BDS)
- Spider and Fungi records gleaned from collections housed and curated by the Hampshire Cultural Trust (HCT)
- Independent Hampshire Entomologist's records
- Earthworm Society of Britain's records

**It is important that these species recording groups (where relevant to the data provided) are acknowledged in any document produced by the data requester where data is incorporated into the document, as a matter of course.**

### *Sharing information about Hampshire's wildlife*

The Hampshire Biodiversity Information Centre Partnership includes local authorities, government agencies, wildlife charities and species recording groups

## Hampshire Biodiversity Information Centre

The following are protected and notable species records from the datasets **listed on the previous page**, within the search area recorded in the last 15 years. For plants this has been extended to 30 years, for bats there is no time restriction:

### Sensitive species

A small number of species are considered as sensitive by the relevant specialist species recording groups and will be indicated as such on all lists. Species may be considered sensitive for a variety of reasons. Location details for these records will not be disclosed unless the relevant species recording group has given their permission. Grid references may be altered to give a less precise position, this is indicated by the 'Grid Ref Blurred' column. Contact HBIC if further information is needed on these records.

### Further notes

- Records of species such as Box (*Buxus sempervirens*) may not appear in the table above because obviously planted specimens have been excluded from protected and notable species lists.
- Bluebell (*Hyacinthoides non-scripta*), Butchers Broom (*Ruscus aculeatus*) and Scots Pine (*Pinus sylvestris*) have a national status, however they are relatively common in Hampshire and so have been excluded from protected and notable species lists.
- Records of Hazel Dormice (*Muscardinus avellanarius*) include those where presence has been inferred from hazel nut evidence. Please contact HBIC if further details are required on these records.
- The location names, where shown, are the originals given by the recorders and may not match any formal name for the location or other colloquial names by which the location may also be known.
- The grid references, where shown, are the originals given by the recorders and may indicate the specific location of the species, a central grid reference representing a larger survey area, or a grid square.
- Where species have been deemed as 'sensitive' by the relevant specialist species recording group the location name will not be shown and the grid reference may have been altered to give a less precise position specified by the species recording group. This will be indicated by a 'yes' in the 'Grid Ref Blurred' column.
- Many of the records have been supplied by specialist species recording groups. Whilst every reasonable effort is made to validate information supplied to the Hampshire Biodiversity Information Centre the accuracy or comprehensiveness of this information cannot be guaranteed.
- Records do not necessarily represent evidence of breeding at a site; please contact HBIC if further details are required for any of these records.
- Whilst a species may have been recorded at a site, this does not indicate that the species is still present. Equally, the absence of a species from a site does not signify that it is absent, only that it has not been recorded, that the site has not been surveyed for this species, or that HBIC has not been informed of its presence.
- Quantities of '0' (zero) indicate that the species was 'present' but the number of individuals seen was not recorded.
- Negative sightings are not included in species lists.

## Invasive Non-native Species Records (full list)

Search Area: Within the Land North of Fareham, Hampshire

Date: 18/09/2020

HBIC Ref: 9344

HBIC has its own extensive database of habitat and higher plant data for the County. In addition, HBIC hold copies of datasets belonging to partner organisations. Through data exchange agreements with these organisations HBIC is provided with regular database updates and can supply species information on their behalf. HBIC currently holds copies of the following datasets:

- Botanical Society of Britain and Ireland's (BSBI) vascular plant database for Hampshire
- British Bryological Society (Mosses, Liverworts, Hornworts)
- Butterfly Conservation's butterfly and moth database for Hampshire
- Hampshire Ornithological Society (HOS) bird records
- Hampshire Bat Group (HBG) Records of bat roost visits and sightings
- Survey data administered by the Hampshire and Isle of Wight Wildlife Trust (HIWWT):
  - Monitoring Survey for the Nail Fungus *Poronia punctata*
  - Alien and Native Crayfish
- Data administered by the Hampshire and Isle of Wight Wildlife Trust on behalf of:
  - Hampshire Amphibian and Reptile Recording Network (HARRN)
  - Hampshire Mammal Group (HMG)
- Hampshire records from The Bees, Wasps and Ants Recording Society (BWARS)
- Hampshire records from National Stag Beetle Surveys and 'Great Stag Hunts' run by the Peoples Trust for Endangered Species (PTES)
- Hampshire Odonata records from The Dragonfly Recording Network, maintained by the British Dragonfly Society (BDS)
- Spider and Fungi records gleaned from collections housed and curated by the Hampshire Cultural Trust (HCT)
- Independent Hampshire Entomologist's records
- Earthworm Society of Britain's records

**It is important that these species recording groups (where relevant to the data provided) are acknowledged in any document produced by the data requester where data is incorporated into the document, as a matter of course.**

## Solent Waders & Brent Goose Strategy 2019

The site codes in the tables below relates to the accompanying map. The records are for the use with the interim project report and updated mitigation guidance which were created in March 2018.

### 1) Positive Records:

The number of records for each site was taken into account with sites having less than 3 records restricted to “Low Use” or “Candidate” categories.

**There are no positive records in your search area.**

Full list of data table attributes:

Field name	Example	Comment
Site Code	C10B	Unique site id, also shown on all maps
Max Count	600	Maximum number of waders or brent geese recorded at any one count
SPA	Chichester.and.Langstone.Harbours	The nearest SPA to the site.
Network Score	Yes	Metric for Network Value.
GB Score	1	Metric for site's importance relative to GB population
SPA Score	1	Metric for site's importance relative to nearest SPA population
SPA Assm Score	2	Metric for site's importance relative to nearest SPA assemblage population
Total Score	6	Sum of all quantitative scores
Num Recs	24	Number of positive records for the site
Classification	Core Area	Overall site classification (see explanation of possible classification in the paragraph under the table)

The attribute column “Classification” can be used to display the following site classifications:

- **Core Areas:** All sites that were identified as having a network value and/or sites that have a max count of bird use of 1000 or more, and/or the max score in 3 metrics (7): GB Importance, SPA Importance and SPA Assemblage

### *Sharing information about Hampshire's wildlife*

The Hampshire Biodiversity Information Centre Partnership includes local authorities, government agencies, wildlife charities and species recording groups

## Hampshire Biodiversity Information Centre

- **Primary Support Areas:** Sites that score 3-6.
- **Secondary Support Areas:** Sites that score 1-2 and/or have max counts of 100 plus birds for any species
- **Low Use:** Sites that have records of birds but in low numbers (total score 0)
- **Candidate:** Sites that have records of high numbers of birds (max count => 100) and/or or a total score =>3 but have less than 3 records in total.  
In a change to previous iterations “uncertain” sites were redefined for this update as being sites with positive records of more than 100 birds but with less than three records, they have also been renamed as “candidate” sites, as their classification is likely to change on the submission of more records.
- **SPA Sites:** Sites within the SPA area that have birds records and form part of the ecological network  
In a further change to previous iterations, sites within SPA sites were not classified but are shown to provide complete picture of the Solent-wide network.

### 2) Brent Goose Sites with Negative Records

Sites with only negative records are shown yellow on the map and details are provided in the table below if applicable.

Site Code	Num Neg Recs
F02	8
F26	3
F27	9

#### Data table attributes:

Field name	Example	Comment
Site Code	C10B	Unique site id
Num Neg Recs	15	Number of negative records for the site

### 3) Brent Goose Sites 2002 without records

#### *Sharing information about Hampshire's wildlife*

The Hampshire Biodiversity Information Centre Partnership includes local authorities, government agencies, wildlife charities and species recording groups

## Hampshire Biodiversity Information Centre

These are sites recorded as being used by Brent geese in the 2002 Brent Goose Strategy, but have had no recent records (positive or negative) since.

**There are no 2002 records in your search area.**

**Data table attributes:**

Field name	Example	Comment
Site Code	C10B	Unique site id
