1.0 Introduction

- 1.1 This Topic Paper is one of a series of notes and papers provided by the Council to support the examination of its Local Plan. It provides information requested by the Local Plan Inspector in relation to Matter 3 (Housing Need and Supply) and Matter 7 (Housing Land Supply) and the first version was prepared in May 2022.
- 1.2 The first part of this paper provides an update to the Local Plan housing supply position. The Submission Local Plan housing supply has a base date of April 2021, this paper updates this position to reflect the supply situation as at April 2022. This takes into account completions during 2021/22, new permissions, and progress on sites to date.
- 1.3 As a result of the updated supply position, the Council has revisited the stepping of the housing requirement. The stepped housing requirement set out in the Submission Local Plan was based on the Council's aspiration to pass the HDT as soon as possible, avoid the associated implications and ensure that development in the Borough can be genuinely plan led as soon as possible. The stepped requirement in the Submission Local Plan no longer achieves that aim. Taking that into account as well as comments from other parties during the Local Plan Hearings, it is considered that the stepped requirement could be improved upon and therefore the Council is proposing a revised stepped requirement through this Topic Paper. Section 3 puts forward this revised stepped housing requirement and the rationale behind it.
- 1.4 The revised topic paper (June 2022) took into account the Inspector's position on housing supply as expressed in the Post Hearing Letter (INSP015) in relation to the delivery assumptions for Welborne (both in terms of start date and peak housing delivery rates), and also the removal of two allocations, Fareham Station East (FTC3) and Fareham Station West (FTC4).
- 1.5 This further revised topic paper (September 2022) takes into account the Inspector's Further Post Hearing Letter (INSP016) in terms of delivery rates at Welborne. It also includes changes to the capacity on some sites as a result of minor discrepancies raised during the focussed consultation (see FBC094).
- 1.6 Finally, this paper looks at the implications of the updated housing supply information and the Inspector's position on the five-year housing land supply and housing delivery test going forward.

2.0 Housing Supply Position Update

- 2.1 The Submission Local Plan has an April 2021 base date; therefore, it is pertinent to update this position to reflect changes that have occurred since then. The Council committed to producing an up-to-date housing trajectory during the course of the Local Plan Examination Hearings, however, it was considered that waiting for monitoring data for 2021/22 to be available would be beneficial.
- 2.2 Since the supply position was published in the Submission Local Plan (with the detailed breakdown provided in the Council's response to the Inspector's initial questions in FBC001), a number of planning permissions and appeals have been granted, resulting in an increased Local Plan supply. Additional large sites now contributing to the supply include:
- Land south of Romsey Avenue – full planning application allowed at appeal (28th January 2022) contributing 225 dwellings.
 - Land east of Posbrook Lane – outline application allowed at appeal (25th February 2022) contributing 57 dwellings.
 - Land between and to the rear of 56-66 Greenaway Lane, Warsash – outline planning permission allowed at appeal (2nd December 2021) contributing 24 dwellings to the supply.
 - Funtley Road South – outline planning permission allowed at appeal (31st May 2022) adding a further 70 dwellings to the supply. The site was previously included in the supply for 55 dwellings as a proposed allocation, however, the planning permission is for up to 125 dwellings. Whilst the appeal decision was issued after the base date (April 2022), it has been included so that the allocation (HA10) reflects the latest position.
 - Land east of Crofton Cemetery and west of Peak Lane – planning permission allowed at appeal (10th January 2022) adding a further 24 dwellings to the supply.
- 2.3 Delivery rates have been updated based on the latest information available. Assumptions used to inform projected delivery rates are set out in the Council's response to Matter 7 Question 6. Delivery rates for sites subject to proposed allocations in the Submission Local Plan are shown in the updated full housing trajectory at Appendix 1.
- 2.4 The updated supply position also reflects the revised windfall rates, as set out in Housing Windfall Projections Background Paper (September 2022).
- 2.5 Table 1 below shows the updated projected delivery rates for the plan period.

Table 1: Updated Delivery Rates (as at 1 April 2022¹)

	2021/ 22*	2022/ 23	2023/ 24	2024/ 25	2025/ 26	2026/ 27	2027/ 28	2028/ 29
Projected Completions	141	331	640	988	902	809	864	644

¹ Including the outcome of the Funtley Road South appeal, see paragraph 2.2

	2029/ 30	2030/ 31	2031/ 32	2032/ 33	2033/ 34	2034/ 35	2035/ 36	2036/ 37
Projected Completions	584	569	661	707	652	552	602	622
Total								10,268

* Actual completions i.e. not projected

- 2.6 As shown in Table 1, the total supply over the plan period amounts to 10,268 dwellings.

Contingency Buffer

- 2.7 As set out in the Council's response to Matter 7 Question 2, having a contingency buffer within the supply is considered appropriate to ensure that the Plan is sufficiently flexible to accommodate needs not anticipated in the Plan and to provide a contingency should delivery on some sites not match expectations. As a result of changes to the housing supply position and in particular, the Inspector's position on the removal of two allocations and the updated contribution from Welborne, the contingency buffer has reduced to 7.5%. The delivery and developability of the proposed allocations were thoroughly tested during the Local Plan examination hearings and therefore the Council has a degree of confidence that this will be found to be a sound approach.

Small Sites

- 2.8 Furthermore, updating the Local Plan supply to a base date of 1st April 2022 has improved the Council's position when considered against the NPPF policy for small sites at paragraph 69. The provision of small sites is more favourable, now accounting for 11% of the overall supply.

3. Stepped Requirement 0

- 3.1 As set out in the Council's response to the Inspector's matters and issues for housing need and supply (Matter 3), the Council considers a stepped requirement is justified. The intention is not to suppress housing delivery or needs, but to ensure that the policies within the plan, once adopted, can carry full weight as soon as possible given the implications of the Housing Delivery Test. The approach has been carefully considered in line with the PPG and is explained below.
- 3.2 A fundamental principle of the Framework is that strategic policies should deliver the full objectively assessed need for housing by the end of the plan period. The submitted Plan allocates sufficient land to satisfy this requirement. The PPG (Paragraph: 021 Reference ID: 68-021-20190722) states: "*A stepped housing requirement may be appropriate where there is to be a significant change in the level of housing requirement between emerging and previous policies and / or where strategic sites will have a phased delivery or are likely to be delivered later in the plan period.*" Both of these situations apply to Fareham. The housing requirement from the Development Sites and Policies Plan and the Welborne Plan between 2011 and 2026 is 5,065 which equates to an average annual requirement of 337.67 homes, therefore the Standard Method figure of 541 represents a significant change in the level of housing requirement. Furthermore, the projected delivery rates set out in FBC001 and FBC064 demonstrates that there are a number of strategic sites that will start to deliver in the middle part of the plan period.
- 3.3 The PPG goes on to say that '*Strategic policy-makers will need to identify the stepped requirement in strategic housing policy, and to set out evidence to support this approach, and not seek to unnecessarily delay meeting identified development needs. Stepped requirements will need to ensure that planned housing requirements are met fully within the plan period.*'
- 3.4 Furthermore, guidance in relation to the HDT, allows for stepped housing requirements. '*Where the adopted housing requirement is stepped, these stepped requirements will be used in the Housing Delivery Test in place of annual average requirement figures. A stepped requirement allows authorities to reflect step changes in the level of housing expected to be delivered across the plan period.*' (Paragraph: 039 Reference ID: 68-039-20190722)
- 3.5 It is important to note that the stepped housing target set out in Policy H1 is not expressed as a maximum figure and therefore allows for more dwellings than the target to be delivered per annum. The housing trajectory in FBC064 (superseding FBC001) set out the anticipated delivery rates and demonstrates the Council's commitment to meeting the Borough's objectively assessed housing need in full by 2037 and maximising housing delivery, both in the short and long term. However, it does demonstrate the phased delivery of some strategic sites, and more specifically, the low levels of completions expected in the immediate term, largely due to the Council's inability, during the period February 2019-August 2021, to grant planning permissions because of the nutrient neutrality issue (further explained in the HDT Action Plan (FBC008)).
- 3.6 The evidence the Council uses to inform delivery assumptions is set out in the Council's response to Matter 7 Question 6 and consequently the Council is confident

that the delivery rates are reasonable and realistic. The total housing requirement and stepped targets set out in this Topic Paper reflect what can be delivered as evidenced by the SHELAA and ongoing engagement with relevant parties. Revised projected delivery rates are set out in Table 1.

- 3.7 Having considered the projected delivery rates as well as comments from other parties during the Local Plan Hearings, it is considered that the stepped requirement could be improved upon. The first 'step' as proposed is shorter, only applying to the first two years of the plan period. However, lower than anticipated delivery rates in 2021/22 mean that the Council is now proposing a lower initial step of 210 dwellings per annum. This is essential to enable the Council to pass the HDT as soon as possible, avoid the associated implications and ensure development in the Borough can be genuinely plan led as soon as possible. The remainder of the housing requirement is annualised over the rest of the plan period, giving an average of 653 dwellings per annum which is slightly less ambitious in terms of annual delivery rates given historical completion rates in the borough. This proposed approach ensures that under delivery is addressed as soon as possible and that housing delivery targets are above the minimum housing need for the vast majority of the plan period. The Council's rationale for a stepped requirement has not changed but we are proposing that there is an alternative approach which is more effective, justified (having regard to latest numbers), and more positively prepared to ensure sustainable development in the borough. The revised stepped requirement, as proposed is set out below. The Council accept that this is likely to constitute a main modification to the Plan but believe it is beneficial.

Strategic Policy H1: Housing Provision

The Council will make provision for at least 9,560 net new homes across the Borough during the Plan period of 2021-2037, phased as follows:

- **At least 420 dwellings (averaging 210 dwellings per annum) between 2021/22 and 2022/23,**
- **At least 9,140 dwellings (averaging 653 dwellings per annum) between 2023/24 and 2036/37.**

- 3.8 The implications of the revised stepped requirement, as proposed, in terms of the Housing Delivery Test and the five-year housing land supply are set out in the following sections.

4.0 Housing Delivery Test (HDT)

- 4.1 As set out in Section 3 of this paper, the implications of the Council's HDT results going forward is a key driver for stepping the housing requirement. The Council's belief in a plan-led system means that it believes it illogical to progress a Local Plan to adoption only for the policies which are most important for determining planning applications to be out of date on the basis of poor HDT results in line with Paragraph 11 of the NPPF. As set out in the Council's response to Matter 3 Question 8, the Council calculates that without stepping the requirement, it could face the presumption in favour of sustainable development until the release of more favourable results in the 2025 HDT, likely to be early 2026 given past release dates.
- 4.2 From our research, we believe that there are only a small handful of authorities (Broxbourne and Rossendale, and Watford at examination), with an up-to-date Local Plan and a five-year supply which need to apply the presumption because of HDT results. The Council does not believe that the intention of the HDT was to stymie progression of Local Plans, particularly in situations where external factors i.e. nitrate neutrality, was the principal reason behind poor delivery rates, and hence reiterates its argument for a stepped requirement to address this unusual situation. This section provides an update to the Council's response to Matter 3 Question 8 and sets out how the HDT results would look with the revised stepped requirement compared to the stepped requirement set out in the Submission Local Plan.
- 4.3 The stepped requirement in the Submission Local Plan was set at a level that would enable the Council to pass the HDT as soon as possible, the 2023 HDT. However, the updated supply position means that the Council would fail the HDT for an additional year, further delaying the return of plan led development in Fareham until the results of the 2024 HDT are published. The tables below provide a comparison of projected HDT results with the stepped requirement as set out in the Submission Local Plan and with the proposed amended stepping.

Table 2: Projected HDT Results with Stepped Requirement in Submission Local Plan

HDT	2019/20	2020/21	2021/22	2022/23*	2023/24*	Total Delivered	Total Requirement	Result
2022	285	117	141			543	1,070**	51%
2023		117	141	331		589	942	63%
2024			141	331	640	1,112	900	124%

* Projected delivery based on revised Local Plan Housing Trajectory (April 2022) (see Appendix 1)

** Requirement based on the assumption that the plan is adopted before HDT 2022 results are published

Table 3: Projected HDT Results with Revised Stepped Requirement

HDT	2019/20	2020/21	2021/22	2022/23*	2023/24*	Total Delivered	Total Requirement	Result
2022	285	117	141			543	980**	55%
2023		117	141	331		589	762	77%
2024			141	331	640	1,112	1,073	104%

* Projected delivery based on revised Local Plan Housing Trajectory (April 2022) (see Appendix 1)

** Requirement based on the assumption that the plan is adopted before HDT 2022 results are published

- 4.4 The comparison demonstrates that even with the stepped requirement from the Submission Local Plan, upon adoption, under paragraph 11d of the Framework, the Council's housing policies would be deemed to be out of date until the results of the 2024 HDT are published (i.e. January 2025 based on previous release dates) and so the Council would face challenge to apply full weight to them. However, this conflicts with the plan-led system and the requirement of a Local Plan to set the development strategy for the borough.
- 4.5 Table 3 shows an improved position whereby the Council would pass the 2023 HDT with the amended stepped requirement. It also makes evident the fact that even with the stepped housing requirement starting at 210 dwellings per annum, the Council is still expecting to fail the 2022 HDT. In fact, even if the housing requirement was 0 for 2021/22, the Council could not achieve a result of 75% or more in the 2022 HDT.
- 4.6 The stepped requirement has been set at the proposed level so that the Council passes the HDT as soon as possible and avoids the application of the presumption in favour of sustainable development as far as possible, and particularly in a situation of a recently adopted Local Plan. It also ensures that the Council will meet their housing requirement over the plan period as required by the Framework. The stepped requirement only proposes a modest reduction for the first two years and for the remainder of the plan period, the annual housing requirement exceeds the Standard Methodology requirement and the annualised unmet need contribution. This proposed approach ensures that under delivery is addressed as soon as possible and that housing delivery targets are above the minimum housing need for the vast majority of the plan period.
- 4.7 As set out in the Housing Delivery Test Action Plan (FBC008), delivery has been constrained in recent years due to the issues of nutrient neutrality and the unprecedented emergence of Coronavirus. Although the Council recognises and welcomes the reduction in requirement that has been applied to HDT 2020 and HDT 2021 results, it has been lobbying Government for a number of years on the nutrient neutrality issue to no avail despite the number of homes permitted in 2019/20 dropping to just 73 making it impossible significantly boost supply in the first couple of years of the plan period. The number of houses built in any given year is, in part, a reflection of the number of sites with planning permission and

there is a lag between the granting of planning permission and the completion of new home on sites. Therefore, even if the housing requirement was not stepped, it would not boost housing delivery in the short term as even if additional sites were granted planning permission now, they would not boost delivery rates for 2022/23 due to the time it would take for the discharge of conditions and construction time. However, delivery rates are improving as evidenced by the large number of sites under construction. The monitoring site visits show that as at April 2022, there were 296 homes under construction in the Borough, giving the Council confidence in its ability to meet its requirement in the current year.

5.0 Five Year Housing Land Supply

5.1 The Framework requires planning policies to identify a supply of specific, deliverable sites for years one to five of the plan period, with the appropriate buffer. In this regard and taking into account the requirement for a 20% buffer (as determined by the 2020 and 2021 HDT results) on the five-year housing land supply, the housing target proposed in Policy H1 ensures that the Council can achieve a five-year housing land supply on adoption of the Local Plan that is realistic and can be sustained. The table below summarises the rolling five-year housing land supply position for the plan period, factoring in the proposed revised stepped housing delivery target periods.

5.2 This analysis clearly demonstrates that, based on the minimum site capacity requirements and the stepped requirement, a five-year housing land supply can be secured upon adoption of the plan and maintained for the first five years of the plan period.

Table 4: Five Year Housing Land Supply with Proposed New Stepped Housing Requirement

	2022/23 – 2026/27	2023/24 – 2027/28	2024/25 – 2028/29	2025/26 – 2029/30	2026/27 – 2030/31	2027/28 – 2031/32	2028/29 – 2032/33	2029/30 – 2033/34	2030/31 – 2034/35	2031/32 – 2035/36	2032/33 – 2036/37
Local Plan Housing Requirement	2822	3265	3265	3265	3265	3265	3265	3265	3265	3265	3265
Under Delivery*	69	55	41	27	13	0	0	0	0	0	0
Total 5 Year Requirement (inc. buffer)**	3469	3984	3471	3457	3442	3428	3428	3428	3428	3428	3428
Housing Supply	3670	4203	4207	3803	3470	3322	3165	3173	3141	3174	3135
Balance Between Requirement and Supply	201	219	736	346	28	-106	-263	-255	-287	-254	-293
5 Year Housing Land Supply	5.29	5.27	6.06	5.50	5.04	4.85	4.62	4.63	4.58	4.63	4.57

* Under delivery of 69 units in 2021/22 against stepped requirement, split over first 5 years

** 20% buffer applied for first **two** years due to expected HDT results with 5% buffer applied from then on

5.3 Table 5, below, sets out what the five-year housing land supply position would be with the stepped requirement as submitted. It demonstrates that the both the submitted and the revised stepped requirement would ensure that the Council have a rolling five-year housing land supply for the first five years of the plan period. The Inspector has advised that the Council should commit to an early review of the plan through Main Modifications, and therefore, by year six, the Local Plan and associated housing supply will be reviewed. It is also important to remember that housing supply is a constantly evolving position. For instance since April 2022, a further 38 dwellings have been permitted at Eversdown Farm (P/20/0506/OA) which would contribute to deliver between 2022/23 and 2027/28.

Table 5: Five Year Housing Supply with Stepped Housing Requirement as Submitted

	2022/23 – 2026/27	2023/24 – 2027/28	2024/25 – 2028/29	2025/26 – 2029/30	2026/27 – 2030/31	2027/28 – 2031/32	2028/29 – 2032/33	2029/30 – 2033/34	2030/31 – 2034/35	2031/32 – 2035/36	2032/33 – 2036/37
Local Plan Housing Requirement	2235	2480	2900	3075	3250	3250	3600	3600	3600	3600	3600
Under Delivery*	159	128	96	64	32	0	0	0	0	0	0
Total 5 Year Requirement (inc. buffer)**	2873	3130	3595	3296	3446	3413	3780	3780	3780	3780	3780
Housing Supply	3670	4203	4207	3803	3470	3322	3165	3173	3141	3174	3135
Balance Between Requirement and Supply	797	1073	612	507	24	-91	-615	-607	-639	-606	-645
5 Year Housing Land Supply	6.39	6.71	5.85	5.77	5.03	4.87	4.19	4.20	4.15	4.20	4.15

* Under delivery of 159 units in 2021/22, split over first 5 years.

** 20% buffer applied for first **three** years due to expected HDT results with 5% buffer applied from then on.

5.4 The two tables demonstrate that a five-year supply will be achieved on adoption of the Plan in line with paragraph 74 of the Framework.

6.0 Conclusion

- 6.1 This topic paper updates information provided in the Council's response to Matter 3 and Matter 7 as well as FBC064, FBC088 and FBC090. The Council's rationale for a stepped requirement has not changed but we are proposing that there is an alternative approach which is more effective, justified (having regard to latest numbers), and more positively prepared to ensure sustainable development in the borough.
- 6.2 Whilst the housing supply has dropped, the plan still includes a contingency buffer albeit it has reduced to 7.5%. This is following changes to the Inspector's position on delivery rates at Welborne following the focused consultation (see INSP016) and the removal of two sites from the Submission Plan. The delivery and developability of the proposed allocations were thoroughly tested during the Local Plan examination hearings and therefore the Council has a degree of confidence that this will be found to be a sound approach.
- 6.3 The stepped requirement has been set at a level that will enable the Council to avoid having to apply the presumption in favour of sustainable development as a result of HDT results and ensure development of the borough will be genuinely plan led as soon as possible, particularly in the situation of having a recently adopted Local Plan.
- 6.4 The Council accept that the revised stepped requirement will likely constitute a main modification to the Local Plan but believes it to be highly beneficial.
