Reasonable	There is basically a sound system of internal control, but weaknesses were found in system design or compliance, which result in some risk to the achievement of the system objectives.
Limited	There are some weaknesses in the system of control designed or the level of compliance which result in significant risk to the achievement of the system objectives.
Minimal	Fundamental weaknesses have been identified such that many key controls are absent or not operating effectively which may put at risk the achievement of the corporate control objectives.

1. Scale of Recommendation Priorities

Essential	A fundamental weakness in the control system which presents immediate risk to the service or system of a significant nature. Requires urgent attention by management. Reported to the A&G Committee and implementation of proposed actions are monitored.
Important	A significant control weakness where the risk is not imminent or only of a moderate nature. This needs addressing but is not urgent. Reported to the A&G Committee and implementation of proposed actions are monitored.
