#### What is Hampshire 2050?

Following a series of Hampshire 2050 Commission of Inquiry hearings between 2018 and 2019, the Hampshire 2050 Vision was established.

It is a vision for the whole of Hampshire, prepared by expert commissioners and endorsed by a range of partners - The Hampshire 2050 Partnership. For further information on the Commission, see: **More about the commission's work**.

On November 23 2023, the Hampshire 2050 Partnership was relaunched at a 2050 Summit.

The Leader of Hampshire County Council, Rob Humby, opened the Summit by saying: "no single organisation has the remit, resources and reach to deliver such a wideranging Vision alone. The Hampshire 2050 Partnership will give our organisations a solid platform to join the dots between us and our longer-term ambitions even more effectively. It will encourage us to collaborate in different, bold and innovative ways to achieve the outcomes for Hampshire's residents and places that we're already striving for." ### **Evidence-Based Strategy**

### **Baseline Carbon Emissions**

### **Climate Emergency and Targets**

Hampshire County Council declared a Climate Emergency in the summer of 2019. Two targets have been set for the County Council, and these also apply to Hampshire as a whole:

Hampshire County Council set a target to be carbon neutral by 2050, in line with national government. Hampshire County Council also uniquely set a target to build resilience to the impacts of a two-degree Celsius rise in temperature. This target recognises the critical role we have in ensuring that not only are we resilient and able to continue to deliver our services, but also ensuring that our infrastructure, environment and communities are prepared too. Hampshire County Council Climate Change Strategy 2020-2025

#### **Our Vision**

Recognising the changing climate as the biggest threat, a well-adapted and resilient Hampshire will be essential to ensure that Hampshire's economy, environment, and society continues to thrive and prosper.

Develop and promote a focus on embedding climate resilience and mitigation across key policies and sectors, working with communities across Hampshire.

#### The Strategy — Key Principles

#### 2. Co-benefits

Within each Strategic Priority, actions that deliver co-benefits will be prioritised. Many actions to reduce emissions and build resilience if done well can deliver multiple benefits for our communities such as reducing congestion, improving air quality, improved health, and economic growth.

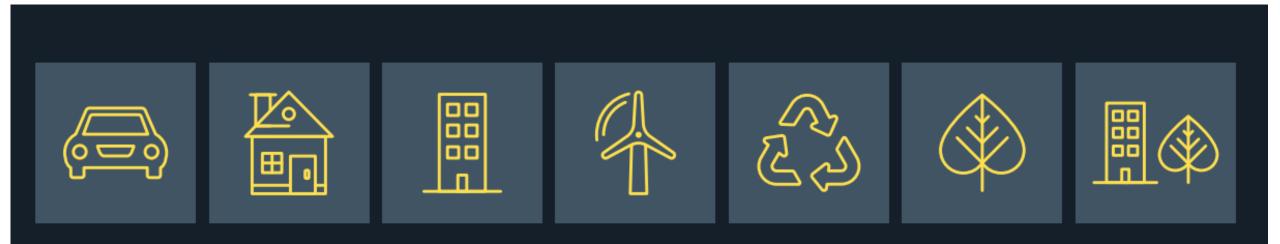

#### **Setting Clear Strategic Programmes**

# **Strategic Priorities**

- Transport
- Residential
- Buildings and Infrastructure
- Energy Generation and Distribution

- Waste and Circular Economy
- Natural Environment
- Business and Green Economy

#### Strategic Framework 2020-2025

#### Climate Change Framework for Strategic Programmes 2020-2025 Carbon Mitigation

These Strategic Programmes have been designed to deliver outcomes to reach our targets in 2050 and are therefore very long term and extensive in nature. As this is the first of the Frameworks to 2025 it mainly focuses on setting the foundations for these longer term programmes. Therefore many of the milestones will go beyond 2025, will overlap in terms of delivery and will be interdependant.

KEY - progress against milestones Green - Amber - Red - Yellow good some minimal interdependant progress progress action

Key Policy Area	Programme	Key milestones	Progress 2021-2022
Transport	Local Transport	<ol> <li>Carbon from transport research - Identify measures most likley to achieve carbon</li></ol>	<ul> <li>1 - DfT have published a decarbonisaiton toolkit. Work is also evolving with transport for the South East who are looking to develop a regional centre of excellence also looking at this issue. Accross the sector various new assessment tools are also being developed and HCC officers are reviewing which ones may be applicable in a HCC context.</li> <li>2. Complete</li> <li>3. Ongoing</li> <li>4. The plan is to adopt them alongside the LTP4 in Early 2023 subject to DfT LTP4 guidance being issues. In the meantime they are being applied in current practice anyway.</li> <li>5. The Draft LTP sets a good policy framework but in additont o that TfSE have been asked by Government to develop a regional electric vehicles strategy. HCC will be inputting into that. Further to this Government are considering imposing a new statutory duty on Local Transport Authorities. The details of this are to be announced. When they are clear further HCC action will follow.</li> <li>6. Still on track although inflational cost increases and reduced avialability of materials in the construction sector may result in a need for the programme to be extended</li> </ul>
	Plan 4	reduction. <li>Deliver tranche 2 emergency active travel scheme if bid is successful.</li> <li>All districts to have local Cycling Walking and Implementation plans.</li> <li>Agree new Active Travel design principles and implement.</li> <li>Develop an Electric vehicle strategy and action plan.</li> <li>Deliver Transforming Cities programmes.</li>	

# Strategic Framework 2020-2025

Strategic Framework of Programmes was developed to tackle the **major strategic gaps** that still existed despite the extensive Action Plan to meet our targets.

Sets out new Strategic Programmes needed for each of the Strategic Priorities.

#### **Key Programme Examples**

- Transport LTP4
- Residential Greening Campaign
- Environment Green Finance
- Buildings and Infrastructure Spatial Framework for Hampshire
- Energy Local Area Energy Planning
- Business and Green Economy Retrofit
- Public Health Health Intelligence

# 2022 Year of Climate Resilience

#### What climate change means for Hampshire

The impacts of climate change are already being experienced in Hampshire – flooding, heatwaves, extreme weather. As well as taking action to reduce emissions, we are also adapting to the impacts of climate change so our communities, infrastructure and environment can be better prepared. Climate change does not just cause physical or financial damage, it can also have much deeper, longer-term effects on health and wellbeing. For these reasons the County Council is not only focused on reducing emissions but also on building resilience.

## **Working in Partnership**

## **Community Projects**

The team have worked with key partners to support community projects to help residents reduce household emissions and become more resilient.

# Partnerships and Networks – Local, Regional, National

Hampshire Climate Officers Group (HCOG)

Public Sector Sustainable Development Group (PSSDG)

Hampshire Sustainability and Energy Officers Group (HESOG)

Hampshire and Isle of Wight Planning Officers Group Sustainable Design Subgroup (HIPOG SDSG)

Hampshire Energy Efficiency Partnership (HEEP)

# HAMPSHIRE 2050

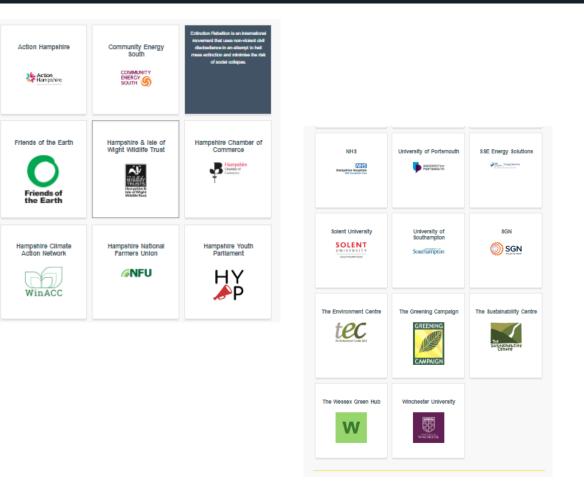

# **Climate Change Expert Forum**

The Expert Stakeholder Forum is made up of more than 20 key organisations that have a significant role in climate change in Hampshire.

This Forum was established to help challenge and inform our approach and help engagement and delivery of actions across Hampshire.

The Deputy Leader Chairs this Forum.

### **Communications and Engagement**

# **Communications, Marketing, Insights**

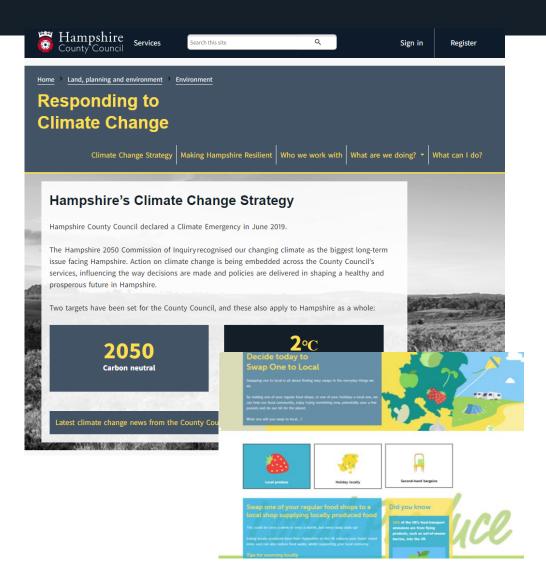

Dedicated climate change website.

Climate change marketing **identity guidelines** which other departments can utilise.

#### **Climate Change Behavioural Insights report:**

- Surveyed over 3000 residents understanding willingness, barriers and motivations for climate-friendly behaviours.
- Calculated carbon savings from 18 behaviours.

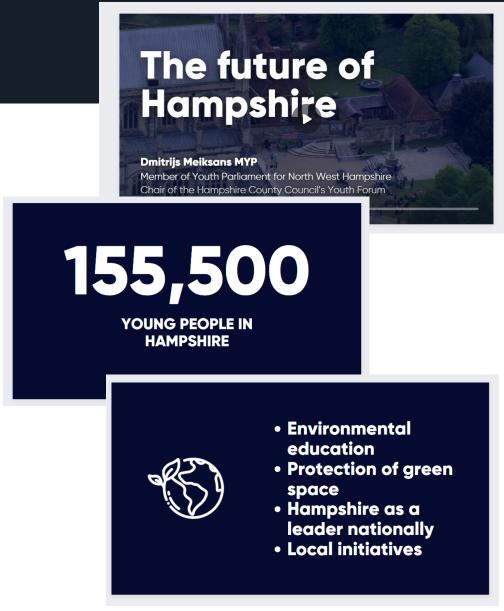

Engagement Campaigns – e.g. Swap one to Local

# Youth Engagement

To inform effective strategy for engaging younger people, on climate change to understand :

- what young people are worried about
- what they want us to do to support them
- which actions they may be willing to take, what impact these could have, and how best to encourage action
- the language and channels to approach younger people effectively

### **Internal Engagement**

#### **Climate Change Board**

#### CLIMATE CHANGE BOARD TERMS OF REFERENCE Updated April 2023

#### 1. Aim

To provide strategic direction to, and enable delivery of, the County's Climate Change Strategy and Strategic Framework to meet the targets of carbon neutrality by 2050 and resilience to a 2 degree rise in temperature, working across the Council and with key partners and stakeholders.

#### 2. Membership

Membership will be made up of officer representatives from each of the County Council directorates, nominated by Directors. Membership will remain flexible to meet the needs of the work programme. Officers may be invited to join or attend on an ad hoc basis according to the agenda. Officers will also be invited on an ad hoc basis to give presentations.

#### Members/Representatives:

- Director of Hampshire 2050 (Chair)
- Head of Climate Change and Environmental Strategy
- Representative(s) from Hampshire 2050
- Representative(s) from Universal Services
- Representative(s) from Corporate Services
- Representative(s) from Children's Services
- Representative(s) from Adult's Health and Care (including Public Health)

#### **Universal Services Directorate**

#### LTP4 Outcomes

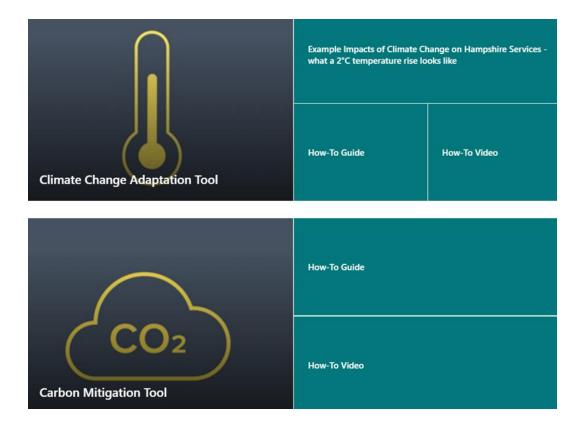

### **Decision Tools**

#### **Climate Change Adaptation Tool:**

- Assesses how climate variables, such as extreme weather and flooding, can impact a project/decision.
- Raising awareness about vulnerability to climate change and encouraging users to think about where adaptations could be made to make a project resilient.

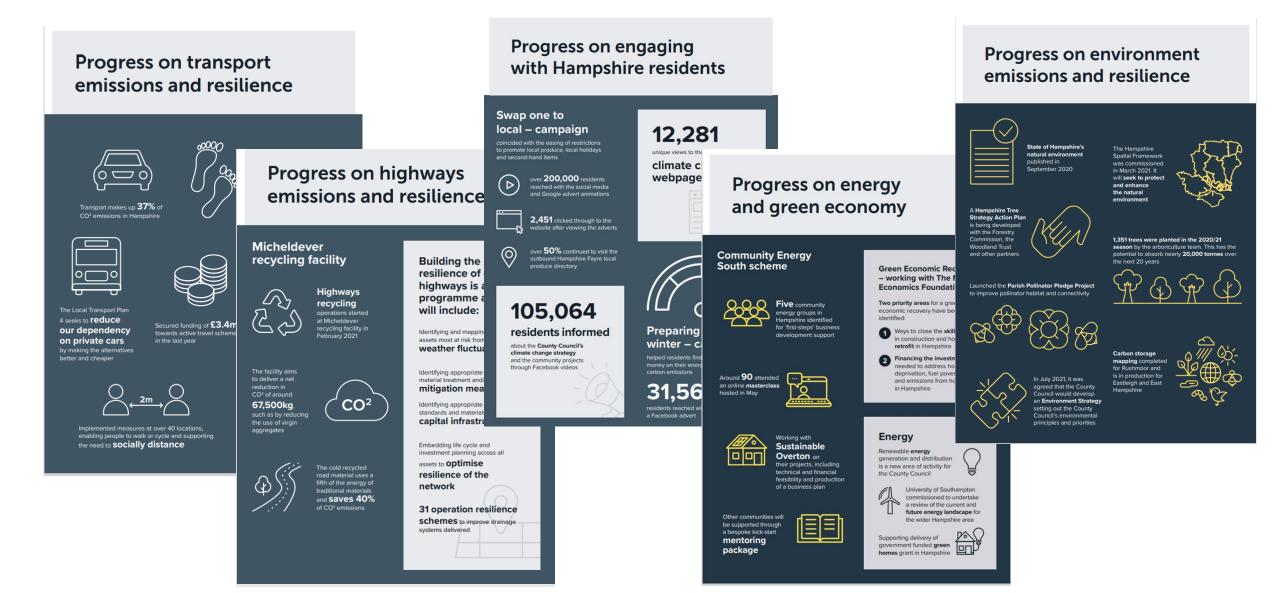

#### **Carbon Mitigation Tool:**

- Assesses carbon emissions.
- Raising awareness of where emissions are coming from and encouraging users to think about how they could be mitigated.

## **Monitoring and Reporting**

## **Progress Highlights**

### REPORTING

#### **Climate Change annual progress**

Each year a climate change annual report is published to show the progress that has been made across the many programmes and projects underway across the County Council, in line with the Climate Change Strategy, to reduce carbon emissions and build resilience to climate change for the wider Hampshire area, with our partners and communities.

#### +) Annual progress 2022-23

+) Annual progress 2021-22

#### Climate Change Action Plan 2020-2025

The climate change Action Plan shows the activity being undertaken by the County Council to reduce emissions and build resilience. It includes all strategic priority areas set out in the Climate Change Strategy including transport, waste and the natural environment.

#### Framework progress

-) Hampshire County Council's Climate Change Response - March 2021

These focused long-term programmes show the progress that have been made in tackling the main sources of emissions and adapting to climate change across key sectors including transport, energy and residential.
