I was looking forward to making some suggestions for average speed cameras or other speed reducing methods, along Redlands Lane & other 30mph residential streets in and around the Fareham Borough.

To my chagrin, the only option available to me after selecting the 'Vehicle Nuisance' box was to access this page, which does not cover nuisance vehicles; the ridiculous loudness of car and bike exhausts, how speed relates to excessive noise etc, etc.

To put the current bike and car noise into perspective, if you attend a track day, at a race track, the maximum allowed noise is 105dB; I would suggest that the current noise level created along residential streets, is way above this; not to mention the fact that it is exacerbated by the reverberations created due to rows of houses either side of the road. Thank you for listening, I sincerely hope that something can be done about this for all resident's sakes.

The motorbike than rides around the west end with no baffler. How has he not been caught?

Vehicles driven in an antisocial manner'. So vague and all-encompassing. That's not really, it seems, what this is about.

Problematic visitors" ""FBC housing only""! Could I ask, it say "let talk antisocial behaviour in Fareham" is that all of Fareham or just the housing side? As I live in the heart of Fareham, pay my council tax to FBC but pay rent to Portchester council! Maybe that could be looked in too.

Foxes are running rife in our area! People should be stopped from feeding them as they are becoming a nuisance in our gardens damaging plants and grass with their fouling, jumping fences and causing disturbing screeching noises during the night which distresses other domestic animals and sleepless nights for some of us.

What about the anti-social behavior of FBC (and HCC) in not cutting back overgrowth along the borough's footpath and pavements. In some areas it is getting positively dangerous for mobility scooters and in some incidences damaging to scooter canopies.

Is this survey meant to be just for housing tenants to fill in or is it for all Fareham residents to fill in?

It seemed like very hard work reading through the draft policy (no simplified version - which used to be available on a lot of websites, though not recently) and I think some people may give up before they get to the end. The most helpful thing, the ABS Procedure Flowchart, was at the very end. I think it would have been far better to have the flowchart at the beginning.

Fareham Matters – 5 Comments

That's obviously the way to resolve the problem just write a many pages' policy document and everything will be alright. Who are the morons the people committing the offence or the people thinking they can resolve it.

Action should be enforced to deal with all of the categories - starting with more police officers out there with the powers which they can use without fear of losing their jobs.

The judicial system needs to be sorted out, punishment is non-existent, parents need to take to task for their offsprings miss-behaviour and fines etc levied at the parents and more community service handed out to work weekends/evenings!
